Dividend Updates

Since we have enhanced our token supply, the previously announced dividend is adjusted. By dividend, we mean distribution of our client tokens which we are in the process of earning in the form of token revenue.

These tokens constitute a major part of our income and we distribute up to 50% of the tokens we earn from our clients.

The board of directors has recommended a dividend 1700% or US \$1.07 (on the last traded price of US \$0.03 per token). This dividend is higher than the previous dividend (previous average price per token was \$8.00 on average). The dividends will be now distributed on May 15, 2019. A dividend form will be issued by March 25, 2019. The record date of the token will be announced by April 2, 2019.
